

FOET WITH CAEBS

FURTHER OFFSHORE EMERGENCY TRAINING
with COMPRESSED-AIR EMERGENCY BREATHING SYSTEM

Introduction

The OPITO-approved Further Offshore Emergency Training programme with Compressed Air Emergency Breathing System (CA-EBS) is a 1-day course which must be undertaken by individuals who have a valid BOSIET (with CA-EBS), BOSIET, TBOSIET, FOET (with CA-EBS), FOET or TFOET certificate. The FOET (with CA-EBS) certificate re-validates a delegate's offshore emergency training for a further 4 years.

Target Group

This programme is designed to meet the further offshore safety and emergency response training requirements for personnel working in the offshore oil and gas industry who will be supplied with a CA-EBS during offshore helicopter travel.

Course Overview

The aim of the (with CA-EBS) is to provide the delegates with the opportunity to practise and demonstrate emergency response skills which are not possible to practise during drills, exercises and emergency training offshore.

Learning Modules:

- ❖ Helicopter Underwater Safety Training
- ❖ Emergency First Aid
- ❖ Fire Fighting and Self-Rescue
